## Regional Characterization Lead Europe (f/m/d) Lampertheim

As Regional Characterization Lead Europe (f/m/d) you will report directly to the Director of Power Semiconductors & IC Characterization Labs. Your main responsibility will be to Lead our Characterization Team and manage our Laboratory in Lampertheim.

### About the Position:

- Technical and disciplinary leadership for the characterization team
- Actively assess and allocate the team's capacity to project activities
- Ensure that the EHS compliance in the team is being followed
- Reviewing and support of the Characterization Team in preparation and generation of project requested documents and data in close collaboration with Project Management
- Ensure the execution of testing procedures according to defined and agreed specifications
- Managing the assigned Laboratory, regarding CE, EHS, EPA/ESD, equipment calibration, internal & external Audits (IATF16949)

### About you:

- University Degree in Electrical Engineering or a comparable field of study
- At least 5 years of professional experience in the characterization/validation area within the semiconductor or automotive industry
- First experience in technical or disciplinary leading of engineers, technicians or working students
- Structured, result- and process-oriented way of working
- Ability to lead employees in a demanding, supportive and motivating manner
- Very good command of spoken and written English and German
- Willingness to travel 10%
